GENERAL INFORMATION

The Department of Energy, Weatherization Assistance Program (DOE WAP) has long served as the core program for delivering energy conservation services to low-income Californians. The Weatherization Assistance Program reduces the heating and cooling costs for low-income families by improving the energy efficiency of their homes and ensuring their health and safety. Among low-income households, the program focuses on those with elderly residents, individuals with disabilities, and families with children.

ASSISTANCE TYPE

Free weatherization services are available to eligible applicants to improve the energy efficiency of homes. Energy saving services include measures such as attic insulation, caulking, water heater blanket, heating/cooling system repair, and other conservation measures.

ELIGIBILITY

Low-income property owners and renters who meet the [Low-Income Home Energy Assistance Program income guidelines](#) are eligible for weatherization services.

FUNDING SOURCE

The weatherization program is funded by the U.S. Department of Energy, Weatherization Assistance Program (WAP) and the Low-Income Home Energy Assistance Program (LIHEAP).

CONTACT

Check the Energy Services [Provider Directory](#) to find the energy service provider in your community, type of services provided, and eligibility, or call the CSD toll-free phone center at 1-866-675-6623.
