

**What do we want our new
community to look like?**

What should our new community include?

- Homes
- Schools
- Recreation facilities
 - Ball fields, gyms, playgrounds, swimming, pow-wow grounds
- Subsistence infrastructure
 - Skinning, butchering, tanning, drying, gardening
- Public services
 - Police, fire protection, emergency medical, health clinics
- Utility & Environmental services
 - Water supply, solid waste disposal, waste water treatment, electricity
 - Natural gas, propane, gasoline
- Religious & Spiritual facilities
 - Churches, Sacred sites
- Business facilities
 - Offices, stores, light industry, RE resource management

Where should our new community be located?

- Access to transportation (locally compact)
- Access to energy
- Access to public services
- Access to employment
- Access to farm products

- Geophysical considerations
- Climatic consideration

The Integration Challenge

How do we tie-in energy, environmental, social, cultural and other factors?

What management, legal, technical, educational and other systems will be required to pull off self-sufficient tribal community development?

Who needs to be on the team?

How can we build and energize and fund this team?
